## Summary

Hi, I am a Full Stack Blockchain Developer. Have around 3+ Years of experience in Web Apps, and Blockchain development. I have worked on many robust applications and have developed a variety of projects from simple restaurant websites to a complete blockchain based projects on several types of servers and developed Databases for several projects.

I have strong knowledge about JavaScript and its related frameworks. I have worked on React JS, firebase etc.

## Professional Expertise

- 3+ years of exclusive experience as Full Stack Blockchain Developer.
- Experience working in an agile development and SDLC environment.
- Strong knowledge about key concepts. Ex. Redux, Context API's, Rest API implementation, Firebase, 3<sup>rd</sup> party services etc.
- Proficient with JavaScript, JSON, HTML5, CSS3 and Bootstrap.
- Write test cases using JEST and Vue-Test-utils to ensure the quality of code.
- Follow best practices to increase the efficiency and reusability of code.
- Experience in building De-Fi-Apps for both Mobile and Web platforms.
- Possess excellent communication skills, work ethics and the ability to work well in a team or individual environment.

## Projects

- **Nifty Souq | LINK: <https://www.niftysouq.com/>**

QUYTECH Associated with **Quytech**

It is an NFT marketplace where sellers can sell their NFTs. There are 2 options for it:

- Single NFT
- Multiple NFT

## Skills

- Blockchain Development
- Frontend Development (using React)
- Polygon Chain, Ethereum Chain, BNB Chain
- Solidity - ERC721, ERC1155, ERC20 Token

## Global Goats | LINK: <https://globalgoats.io/>

QUYTECH Associated with **Quytech**

The project is for an admin who wants to sell his 2323 NFT. Max number was fixed by admin i.e. 10 for 1 time. These NFTs include some normal NFTs and some Golden NFTs which the client will need in future processes.

The website is developed in React JS with the help of PHP and MySQL. AWS server is used and data was stored on IPFS using Infura APIs.

Skills:

- Polygon
- IPFS
- React JS
